The natural stone Pacific series is a unique pebble mosaic. Available in a tumbled format or a honed cut oval, this mosaic is versatile enough to suit anything from a rustic modern to a boho natural look. We recommend using a sealer to protect the stone; either a natural sealer to keep the original look, or an enhancing sealer to deepen the colours of the stone.

### General Specification

Material: Natural Stone  
Intended Use: Floor/Wall

### Pebble Mosaic

Box Qty: 10 sheets  
Coverage: 1 sqft/sheets  
Sheet Size: 12" x 12"

This is a natural stone product; we recommend sealing it. It can be sealed with an enhancing sealer to bring out the colour, or a natural look sealer to retain the dry look of the stone. The loose mosaics in the box will look significantly different than the sample board until sealed with an enhancing sealer. To verify the shade before installation, please wet the pebble sheets with water. This will simulate the enhancing sealer (without the shine) so you will be able to confirm the colour and shade. We recommend Stonetech or Omni brand Enhancing Sealer for best performance. Pricing and specification may change without notice. Sizes shown in inches and are approximate.
